Forecast 10 days ahead
With StormGeo Online Global Weather, our clients reach their customers with turnkey products and dynamic data delivery, adapted for each client’s individual needs—in minutes.

**How many weather forecast locations are provided?**
Forecasts are provided for any location globally supported by a multi-language location database with more than 10 million named spots – cities, known landmarks, popular holiday locations and much more.

**How often are the weather forecasts updated?**
With StormGeo’s detailed forecast, you get the hourly forecast the first 4 days, followed by 12-day, long-term forecasts every 6 hours for any location. The weather forecasts are continuously updated as new model runs are available or our global team of meteorologists edits the forecasts.

**What is the Global Map Player?**
We know a picture is worth a 1000 words. We provide global map layers for precipitation, temperature, cloud cover and regional radar coverage.

**Do you provide climate data?**
A monthly overview shows the days of precipitation and temperature for planning the next business trip or holiday for a city or region.

**Can I get what is important for my region?**
StormGeo will add the most relevant parameters. Is moisture relevant for your users? Fog or sandstorm? Severe precipitation? You let us know and we provide the requested changes.

**Do you have an example of your weather page integrated in an external web portal?**
We have many! Here is an example of Nettavisen’s (Norwegian Newsportal) web portal:

“In less than 2 years StormGeo’s unique online weather solutions have boosted our earnings 600%! Through their online solution we are covered on all platforms such as TV, WEB, Android and iPhone app’s, mobile weather warnings, online competitions and more. We value the collaboration and effort highly in our daily work to inform and attract new users”

Ronald Toppe, Projectleader, TV2
What is the cost for the weather forecast provided?

We Offer Two Packages to Support All Standard Ad Formats

1. Ready-to-go & deploy. The weather site is ready for deployment – ads are in place and revenue will be shared based on traffic generated, - or -

2. Integrate your ad system. StormGeo will, on request, enter into a partnership where your ads are used on your new weather site and be the basis for the revenue share.

Can I get user analytics?
Page views, unique users and other relevant data included in your overall site metrics give your sponsors high-relevancy while giving you higher earnings as the weather site grows as part of your total online offering.

Technical Specifications

Does the weather page work on all platforms?
The weather site ready to deploy across all your platforms from mobile to desktop, and can be added to your native mobile apps with all the functionally working out-of-the-box through basic web view.

Can I get the weather in different languages?
Choose among 25 languages and preferred metrics in the display.

You can choose from several languages in the control panel. Here are examples of Chinese, Arabic and Italian.

Can the solution be customized with my favorite locations?
The weather site remembers the users last visited locations and these can be changed. You can also set predefined/default favorite locations for your site.

Can I change the look and feel to suit my preferences?
Our customized profile puts you in the drivers seat. Overrule the default CSS and adopt the colors, fonts and weather symbols that match your design profile.
StormGeo is a global provider of advanced analytics and meteorological services delivering decision support for weather sensitive operations.
