

# StormGeo Studio

// StormGeo Studio opens a lot of possibilities for publishers, such as on-demand weather data for over the top (OTT) playouts, adaptive graphics across different devices and the possibility to offer regionalized weather data to their users and viewers.

## Key features and benefits:

- // Access to world class weather forecasting and data intelligence.
- // StormGeo Studio is a cloud and subscription based software built with award-winning graphics from Singular.Live.
- // Requires no dedicated hardware or upfront investments.
- // Easily integrates into your existing SDI, NDI or streaming media workflows.

## Workflow and easily accessible:

- // Built on common web standards.
- // StormGeo Studio API's for interaction, templates and rendering capabilities are easily integrated into your workflow.
- // StormGeo Studio runs across all browser enabled devices without the need for 3rd party plugins.
