

# Employee Hurricane Preparedness Presentation

## Utilize Expert Knowledge to Prepare Your Business

Natural disasters can strike businesses and homes all over the world at any time. In fact, weather is the number one source of business interruption. How can you know if and when a disaster will strike? And will your employees have the knowledge to make the best decisions, ensuring a quick and safe recovery?

Designed by StormGeo, the Employee Hurricane Preparedness Presentation (EHPP) provides you and your employees with basic tropical weather education and hurricane preparedness training. Our goal is to make you feel ready, both at home and at work, to act appropriately during situations where every decision counts. EHPP training can mitigate injury, minimize damage and speed the recovery of your business after a storm has passed.

### StormGeo's EHPP Topics Include:

- Basic tropical meteorology principles and terms
- Hazards such as wind, storm surge and flooding associated with tropical cyclones
- Emergency/Hurricane kit preparation
- Pre-season personal, family and home preparations
- Evacuation and ride-out checklists
- Family/employee communication plans
- A look at preparedness tech, including helpful mobile applications
- Post-storm recovery efforts and safety
- An exclusive StormGeo preview of the upcoming tropical weather season

### Presentation Information:

StormGeo relies on our team of expert meteorologists to deliver the EHPP presentation, which can be provided on-site or via webinar. The presentation takes approximately 45–60 minutes with a Q&A session to follow. Additionally, portions of this training can be applied to other types of disasters such as floods, extended power outages and more.
